

We demand
critical thinking
to become part of
the school
curriculum!

» The complete demand is as follows:

We demand critical thinking to become a part of the obligatory private and public school curriculum for at least one hour a week from the ages 10–16 in order to fight fake news and disinformation with media and information literacy and to encourage youth participation and motivation to be a part of the debate.

This demand was formulated at the EU Youth Conference by youth delegates from all over Europe. Together with six other demands they have become part of the Conclusions of the Council of the EU (2020/C 415/09). The demands summarize important steps in order to put European Youth Goal #9 “Space and Participation for All” into practice.
