

We demand a
voting age
of 16 in all
elections!

» The complete demand is as follows:

Ensure young people's access to formal decision-making by lowering the age of voting and political candidacy to 16 in all elections, while ensuring all youths have the opportunity to gain sufficient skills and motivation to participate actively and passively in elections, as well as removing all barriers to voting.

This demand was formulated at the EU Youth Conference by youth delegates from all over Europe. Together with six other demands they have become part of the Conclusions of the Council the EU (2020/C 415/09). The demands summarize the most important steps in order to put European Youth Goal #9 "Space and Participation for All" into practice. For further information: euy-en.dbjr.de
